NATIONAL PARKS OF THE USA

There are 58 national parks in the US.
Most national parks and public lands
are located in the West.

A large elk with impressive, multi-tined antlers stands on a rocky, grassy hillside. The elk is facing left, with its tongue slightly out. The background features a clear blue sky with scattered white clouds. The text "ROCKY MOUNTAIN NATIONAL PARK" is overlaid in orange, sans-serif capital letters across the middle of the image.

ROCKY MOUNTAIN NATIONAL PARK

GRAND TETON NATIONAL PARK

An aerial photograph of a geothermal landscape in Yellowstone National Park. The scene is dominated by a large, vibrant blue and turquoise mineral pool in the center, surrounded by intricate, multi-colored terraces of orange, red, and brown mineral deposits. A wooden walkway with railings winds through the landscape, allowing visitors to view the pools up close. In the background, a parking lot with several cars and a small building are visible, along with a dense forest of evergreen trees. The foreground shows more of the mineral-rich terrain and some tall, thin, dead tree trunks.

YELLOWSTONE NATIONAL PARK

A large, natural rock arch made of reddish-brown sandstone dominates the foreground. The arch is perfectly balanced, with a flat top. Through the opening of the arch, a vast landscape unfolds, featuring rolling hills and a range of mountains with significant snow cover under a clear blue sky with scattered white clouds. The lighting suggests a bright, sunny day.

ARCHES NATIONAL PARK

CANYONLANDS NATIONAL PARK

GRAND CANYON NATIONAL PARK

A wide-angle landscape photograph of Yosemite National Park. The central focus is the iconic Half Dome granite peak, which is partially illuminated by sunlight, creating a warm glow on its upper surface. The surrounding terrain consists of rugged, layered granite cliffs and valleys. In the foreground, there is a lush green meadow with some scattered rocks and a few evergreen trees. The sky is filled with large, white cumulus clouds against a deep blue background. The overall scene conveys a sense of natural grandeur and tranquility.

YOSEMITE NATIONAL PARK

A large, snow-capped mountain peak dominates the background under a clear blue sky. In the foreground, a line of hikers is ascending a rocky trail that runs along the edge of a snowfield. The hikers are wearing various outdoor gear, including hats, backpacks, and trekking poles. The snowfield is a mix of white snow and dark rocks, and the overall scene is bright and clear.

MOUNT RAINIER NATIONAL PARK

VOLCANOES NATIONAL PARK

46 % OF THE US WEST IS PUBLIC LAND

- Havasupai
- The Wave
- Monument Valley
- Lake Powell

HAVASUPAI

THE WAVE

A photograph of Monument Valley at sunset. The sky is a gradient of purple and blue, with a bright orange and yellow sun low on the horizon. Three prominent butte rock formations are silhouetted against the sky. The text 'MONUMENT VALLEY' is overlaid in the center in orange.

MONUMENT VALLEY

A wide-angle landscape photograph of Lake Powell at sunset. The sky is a clear, pale blue, transitioning to a warm orange glow near the horizon. The water is calm, reflecting the sky and the surrounding rock formations. In the foreground, two prominent, layered rock spires stand on a rocky outcrop, illuminated by the low sun. The middle ground shows the lake's surface with several small, dark islands. In the background, a range of rugged, layered rock formations stretches across the horizon, their faces also catching the golden light of the setting sun.
